

ZACK CUNNINGHAM

A showcase of the skills I have developed.

3D MODELLING

My 3D modelling skills are limited but here are some examples of what I have done in maya for previous projects.

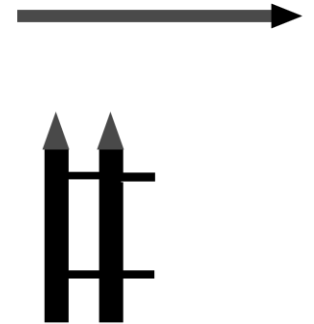

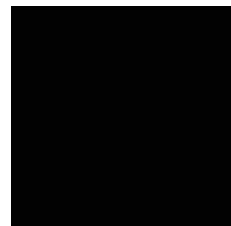

These were my first ever frames
created intended to be used in a
sequence to create an animation..
This was for the main characters
walking animation. (created in
paint)

2D GAME (FADED)

These were repeatable assets used for
the 2 levels created for this game

SHORT FILM (SPLICER)

2D GAME (POCKET GALAXY)

[HTTPS://YOUTU.BE/OJANSYEVZII](https://youtu.be/oJansyEvZII)

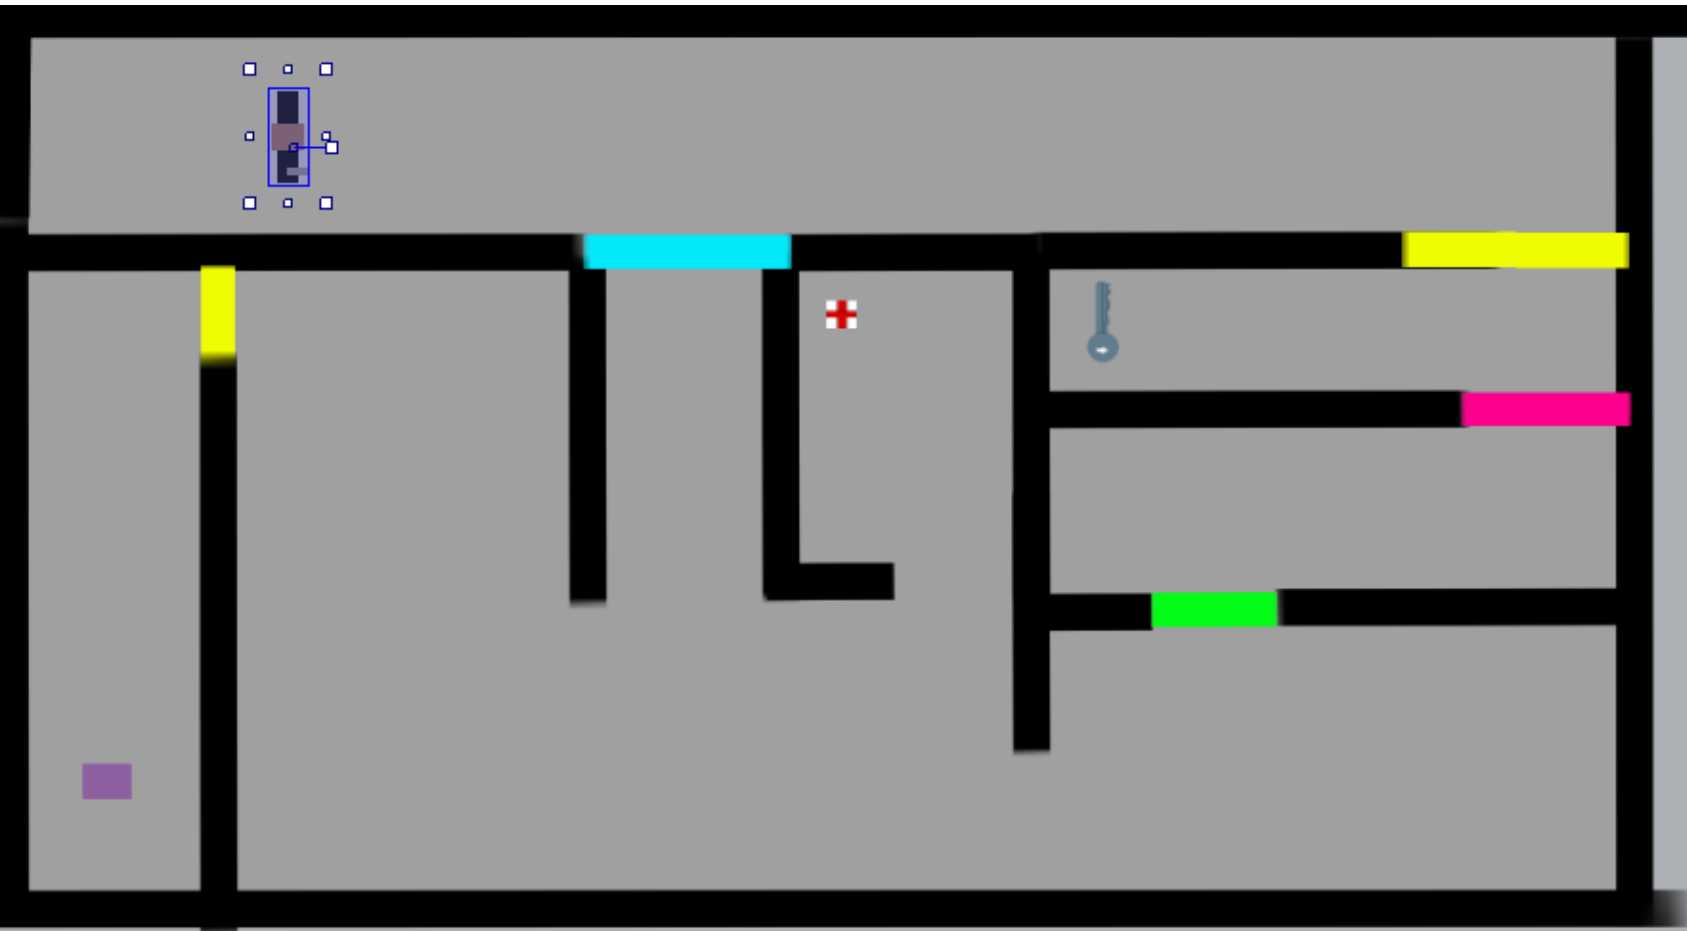

This is a screen shot of the whole of level 1.

Level 1 is set on the main characters ship as he has his first encounter with pocket galaxy's enemies/species (spinderlers)

My first priority was the main character and the enemy.. Only the enemy ended up being animated.. There are other assets that I created in the same software that I created the game in.. I don't have pdf files for them but they are shown in the YouTube video here <https://youtu.be/OJAnSyeVZil>

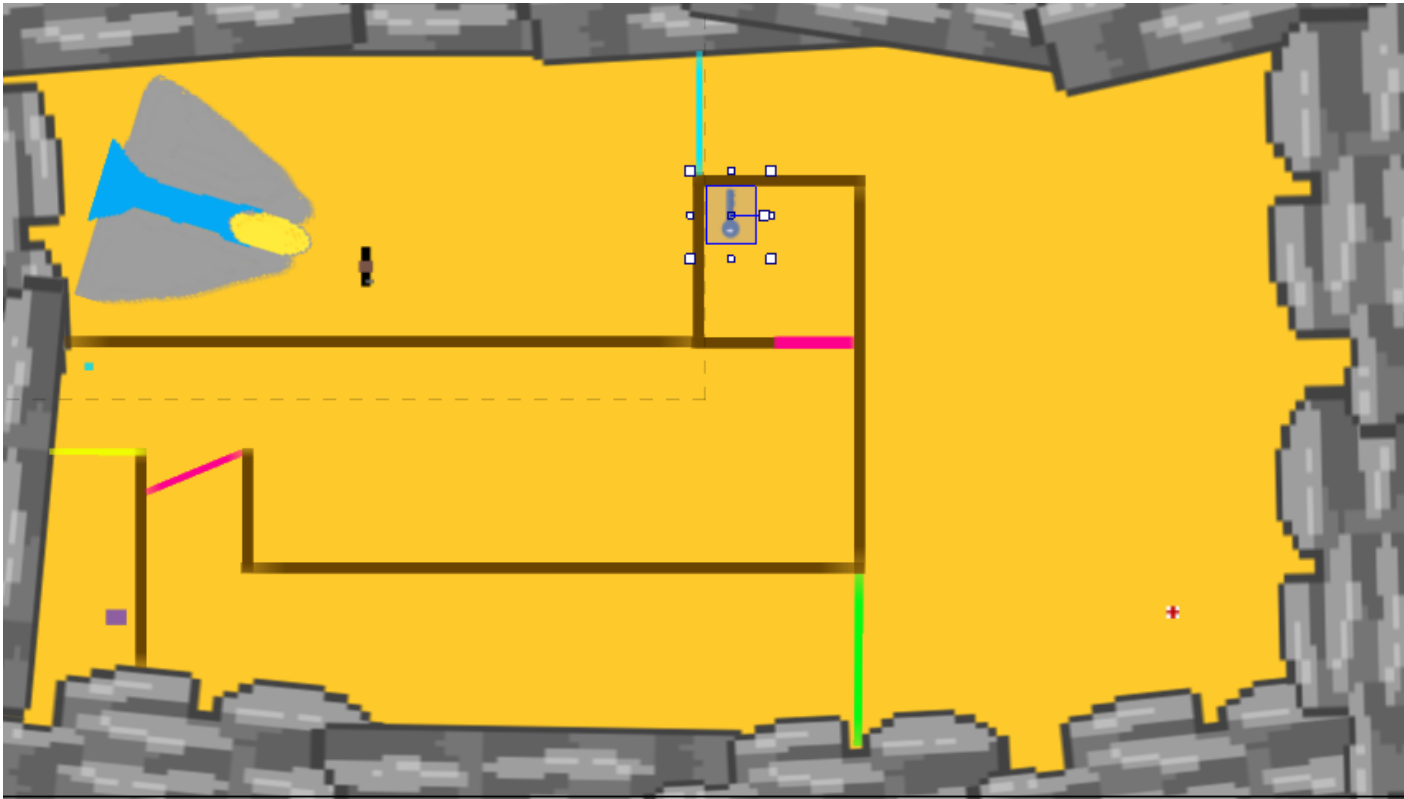

Pocket galaxy level 1

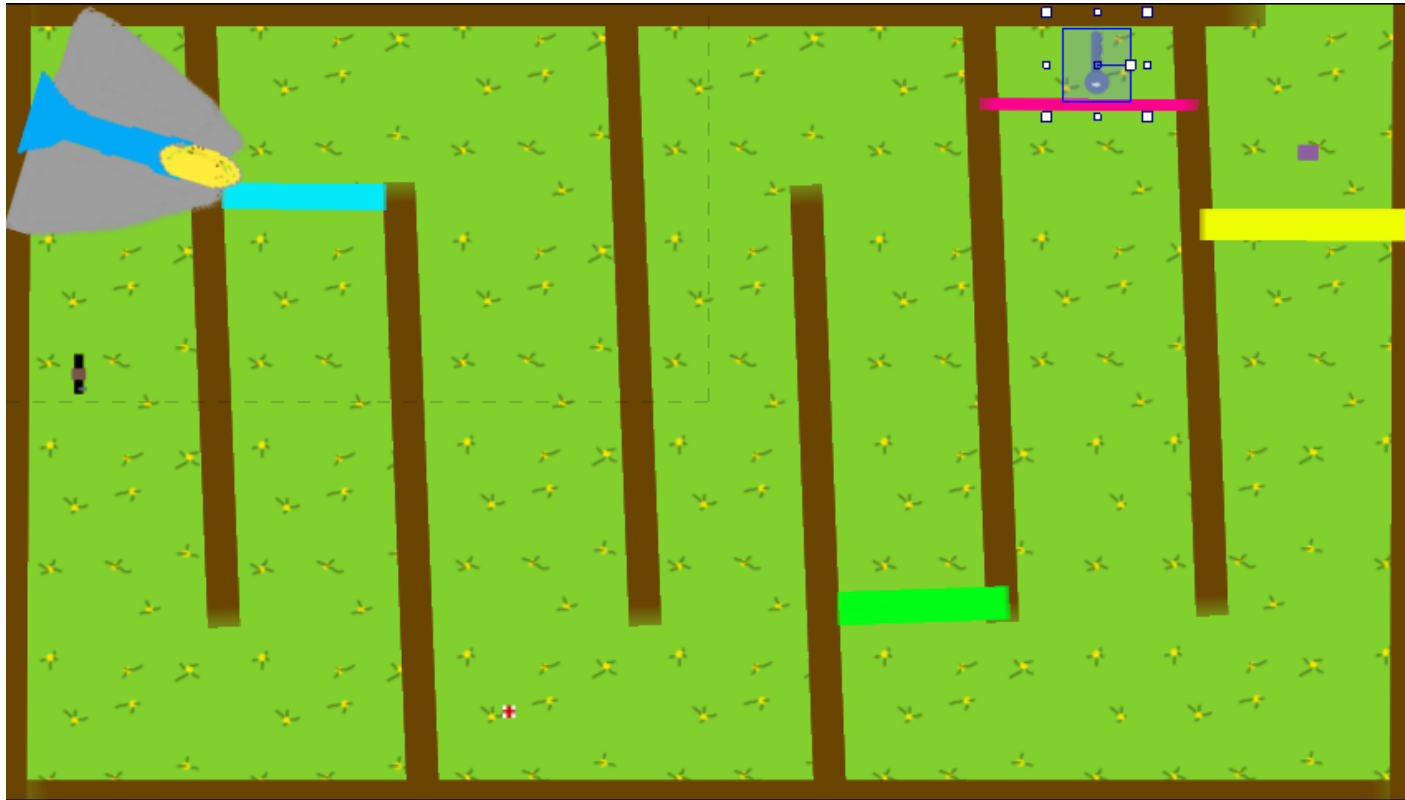

This is a screen shot of the whole of level 1. Level 1 is set on the main characters ship as he has his first encounter with pocket galaxy's enemies/species (spinderlers)

Pocket galaxy level 2

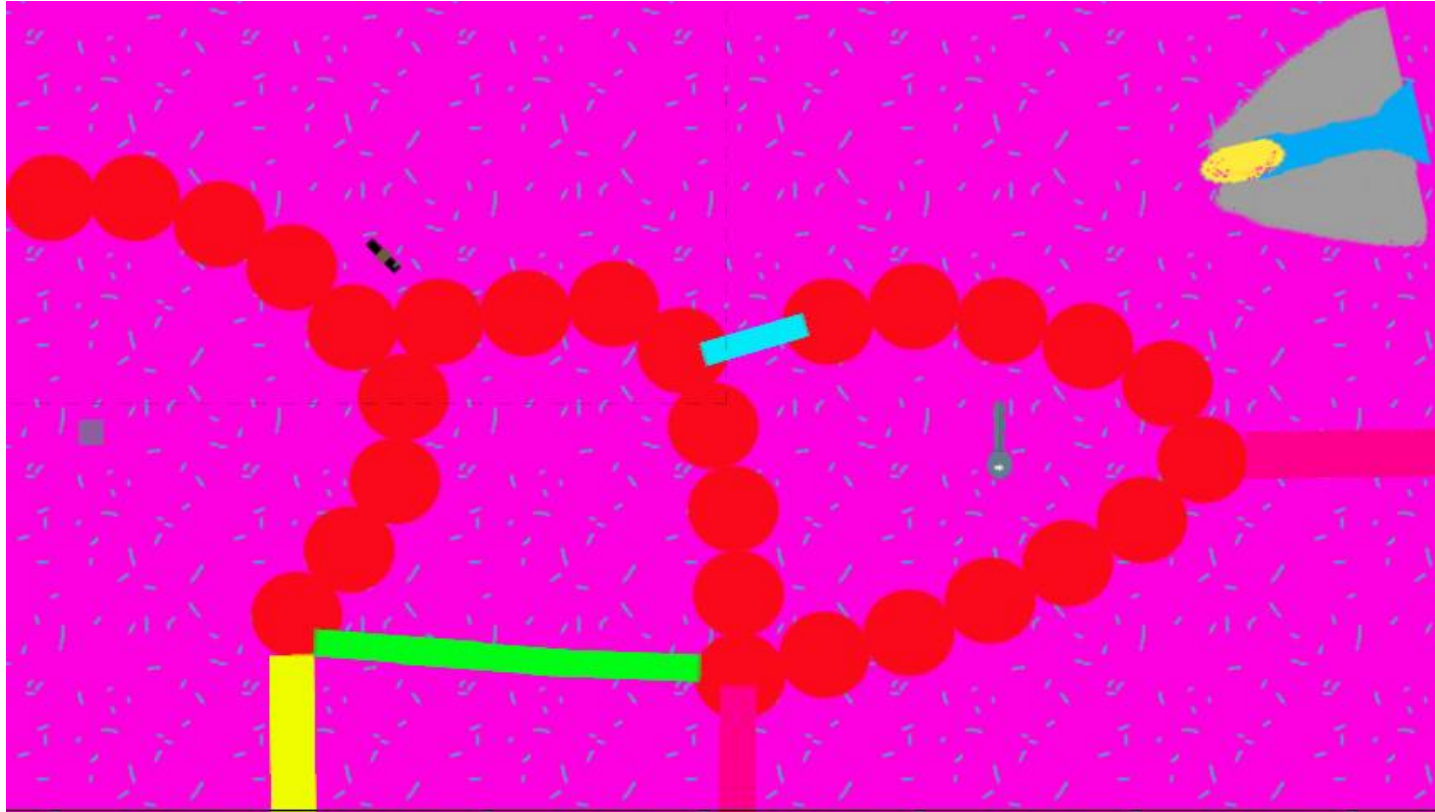

This is planet titan, a rather small planet filled with nothing but rocks and sand.

POCKET GALAXY LEVEL 3

This is planet Skiptop. A gigantic planet covered in alien plants; however, they seem to be breathing.

POCKET GALAXY LEVEL 4

This is planet Glipglup. This planet was the intended location for a boss fight. There would have been a fifth level that was also set on this planet where the Spinderlers queen nested.
