Student Evaluation Sheet Interview

- What progress have you made on your FMP so far?

The progress I have made on my FMP are the characters for the game by using Pixel art and we are using construct for the game and will have all of the sprites to by the sizes of '64x64' pixels because if its bigger and it will look all of the place and it will look messy as well

- What are the strengths of the work you have completed so far? (Research, Context, Planning, Practical, Evaluation)

One of my strengths for the project is context because when I have put my work on digital space, I have explained of what I have done for the soft wear and I also good at evaluated my work as well to see what went well and how I could have improved my work and I am also good at planning what I need to do for the week because when I have reflected on my work, I have been doing my weekly targets for the week.

- What are the weaknesses of your project so far? (Research, Context, Planning, Practical, Evaluation)

One of my weaknesses from the project is research because I know what I am doing but I forget to research the soft wear I am using and also sometimes I do have trouble with the practical because if I don't have a plan I will not know as well so that why I always plan the work so I can know what I am supposed to do.

- What problems have you encountered and how have you solved them?

One of the problem I have was the soft wear because we didn't have a correct for the game we needed so we have to use the constructed and another one of the problem I had was the charity where all the graphics with how their liked.

- How do you feel about your project? are there things you would have done differently?

How I could do the project was if I focus on the other effects of the world like pollution, the government as well to see how people can hurt the world and the animals as well so that what I could do different.

- Is there anything you can do that will significantly enhance the quality of work? (Research, Context, Planning, Practical, Evaluation)

One thing I could change was doing more are the research so I could get more of the understand of the dangers it as on the world like the pollution and the deforestation.
