

My Pitch: Documentary

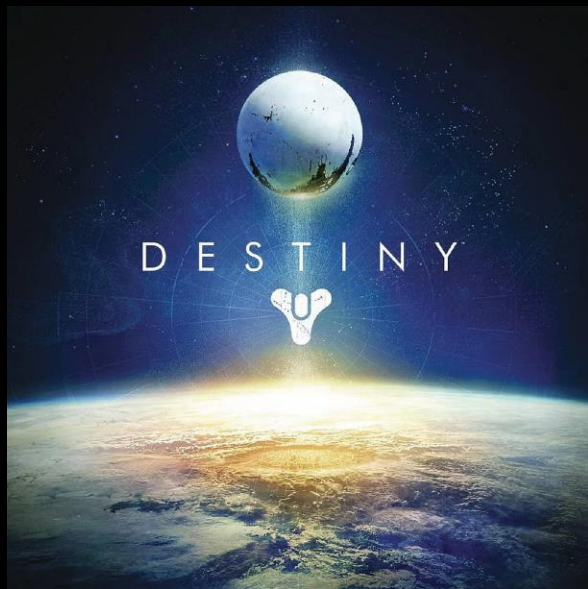

Michael Bell

FMP Idea Documentary on the history of destiny

What is my project?

My project will be a documentary that focuses on the history of the video game destiny 2 in which I will go over all its history including the many struggles and changes it has gone through in the last half a decade and showing why the game is very successful even to this day.

Why am I doing this project/ aims and goals

I have chosen to do this project because I believe this is a good way to show off the skills I have learned throughout the year and give me a lot of freedom in my project

My aims with this project is to showcase the skills I have developed inside of photoshop, and premiere pro, and to also develop and improve them even more at the same time and to show how I can produce and develop different ideas.

A lot of my inspirations are from different videos I have seen on YouTube as there is a massive community for this game and everyone is very passionate about it. Such as a youtuber called my name is byf who made a four hour long video covering the entire history of destiny back in its first release in 2014, and I wanted to do something similar but of course of much smaller length, I want to do this also because I have my own personal attachment to the game as I have been playing it since it came out so I have kind always wanted to create something like this.

Inspirations

- For my project I will be mainly using premiere pro, OBS, audacity and photoshop as these are all key components too my project and will be required for me to be able to finish it, I may use additional software later in my project.

What will I be
using in my
project

- I mainly plan on uploading my work too YouTube when it is completed but I have no other plans right now to post anywhere else for the moment.

Branding

Thank you for listening
to my pitch
