Presentation Evaluation

To improve on my presentation, I would go through it slowly and not speed through it and I would go into more detail on what the plan is and how we want to accomplish the end product. I would also talk more on who I was working with and go through how we would research the product. I would also go through the charities we are working with and talk about what they do and how the game would work with it and also go through the entire idea of the game in full detail.
