

### Problems and solutions

The problems I had were uploading the work on to digital space as well as making the journal that shows what I did and when so I can use it in my reflection of the documentary. Another problem that I had was that the documentary sound didn't load right so that the documentary didn't right and so I was not able to present it

To solve the problems, I had I turned they word files into pdf files and uploaded the work and decided to go through my work and work out when they were made and what I did. To fix the documentary I decide to remake the documentary and fix they sound issue.
