

## Project reflection:

What I did in my project is talk about two Pokémon games with both their trailers and gameplay. To improve I would have talked about my opinions on the games and what I think they could do to improve the games. I would also talk more on the difference on the games and trailers of the two games I chose. I also would try to get an interview with some people to get their thoughts on the matter. To improve my project for next time I will make sure to fix the audio of the video and make sure that it all lines up with the video. I would also try to get an interview to ask people for their own opinion on the games and make sure that I make sure that my project audience is the same as in my proposal and make sure that I make sure to double check the documentary before presenting to see if it needs changing and make sure the audio is working correctly.
