Electronically realised composition (assessor LB)

The track is excellent, but it is very difficult to determine what you added to this and what was already produced. It sounds like you have added vocals and then mixed the track. This is the reason it is not very suitable to work from home as it is difficult to measure your progress and your work. The write up is very vague and doesn't explain the creative process well. The evaluation is ongoing and provides some areas for improvement. There is research into composing for moving image but it is rather brief.
