

Kenzie

I like that this logo is readable but still gives the logo personality this logo can also be easily translated to many art works as it leaves room for lots of variation like the rock version on Master of Puppets or the electric version on Ride the Lightning this can even be translated to the recent singles and album 72 Seasons

Led zeppelin

- It's a recognisable logo as not only is it easily readable but there can be a lot of artwork that can go with it this may show up well on for example on a festival poster because of easy readability

LED-ZEPPELIN

Linkin park

- I like this logo because there are two main versions of this logo
- This could add recognisability but it could also be a con because it could potentially do the opposite if one is used more prominently than the other

Iron maiden

- The iron maiden logo gives me inspiration because they have a distinctive font this increases recognisability and can be good for promotion or merchandising

Motorhead

- Motorheads logo is distinctive because they have the war pig in conjunction to their logo this gives their logo more recognisability this can be seen on many of their albums like Overkill their self-titled album and March or Die this can also give the music a sense of consistency

Judas preist

- This logo one again has the distinctive font thet can be seen on albums like invincible shield british steel and painkiller this logo is also on an angle this can give unequeness to the logo and can help with indivijuality

AC/DC

- AC/DCs logo shows both a clear representation of the artist and gives the listener an opinion on what they can expect this also adds clear distinction to the logos and allows for a lot of variation

Korn

- This logo has a great degree of creativity with details like the backwards R to add difference as this would be different to many of the other bands during the nu metal era also the logo looks painted this adds more distinction to the logo and leads to many ways to use the logo in different places

Avenged sevenfold

- Avenged sevenfolds logo has a lot of simplicity but also has a symbol or recognisation with the dethbat as this is something that has appeared in a great deal of there albums like the stage wakeing the fallen and there selftitled album this can lead the logo to be come an icon and can add more personality to a logo

Slipknot

- This logo has simmalar aspects to korn and ironmaden in the ... , ... distinction like the distinctive use of a capital T at the end this adds intensity to the logo as they are a band that has intensity in there art and live proformances it gives listeners an idea of what to expect
