

Hi,

So I've taken a good look over the Panasonic S5's we have for loan and they should do 4k 60p video if that works for what you need. They also do a reasonably high frame rate photo mode at 24mp that could also work for you. They come with 20-60mm F3.5 to F5.6 lens and a high speed sd card.

If you let your tutor know that you'd like to use them just so we can authorise you to be able to book them out and then let us know when you'd like to book them that would be great 😊 If you need us to go over the settings on the camera let us know as well.

Thanks,  
Sam

Ps here's a product page on them:

Hello there,

I am glad to hear it. If I am still ok to use this camera, I would like to book one out for this Wednesday. Also, am I able to book it out for a week as I asked before or will it be on a shorter allowance?

Thanks,  
Mackenzie

Hi,

I'll get that booked in for you, a week should be fine at the moment, do you need a tripod?

Thanks,

Sam

Hello,

I have a tripod that I can use. I will come over to Central Media Wednesday morning if that's fine with you guys?

Thanks,  
Mackenzie

That should be fine.

Thanks,

Sam
