

## POCKET PLANET PROJECT EVALUATION

**TASK:** Write a 200-300 word evaluation of the 'Pocket Planet' project.

Use the following bullet points, as a framework around which, to write an evaluation of your project (this can be handwritten). Consider how you present your project evaluation - you can also incorporate visual elements to support/illustrate your written work.

### Use the following bullet points to help you structure your evaluation:

- How did you interpret the Pocket Planet theme (what idea/theme did you use)?
- What inspired your idea/theme (think about your interests, the research you did, gallery visits, other artists and any discussions you had with your peers or tutors)
- How did you explore your ideas? (consider what workshops you took part in, how you have developed these or how you have developed your ideas independently)
- What problems/issues did you face? How did you solve these?
- What went well? What didn't go so well?
- What did you learn (consider the materials, techniques and processes you have used)?
- How did you experiment with and develop your work?
- What would you do differently next time?
- Where do you believe you were successful?
